

School Closure Daily Plan for Learning for Week 3

Week beginning 20th April 2020

Dear Sika Class,

I hope you were able to enjoy eating chocolate and spending time in your gardens during the Easter Holidays. I have been very impressed with the photos and comments shared through Mrs. Turner's special email address and hope you carry on communicating this way whilst we are away from school. I am thinking of you all every day and hope you are still being kind and helpful to all the people who live in your household!

Take care.

Mrs. Pinnegar

Each day the children will need to complete the following activities:

1. English Activity which combines Reading, Writing and Grammar.
2. Maths Activity which involves reading through the information followed by solving calculation and word problems.
3. Science Monday to Thursday and RE for Friday

The tasks above equate to the approximate amount of time spent completing activities during a normal school day.

- Answers have been attached for the above activities so parents and children can mark these together each day.
- A useful website to support maths is www.mathsisfun.com and www.nrich.co.uk
- A useful website for Spelling, Punctuation and Grammar is www.bbcbitessize.co.uk

The activities can both be printed and filled in, or answers recorded in the exercise books provided. If work is to be completed in books, then please make it very clear which work is completed by giving each piece the relevant title and possible page number. Although work is completed at home, we will be expecting all work completed to a high standard and handed in when the children return to school.
