Great Gardens

Today we will be thinking about plants found in gardens.

Great Gardens

Gardens are places where people grow plants.

Some people grow plants because they are nice to look at.

Some people use their gardens for growing things to eat.

You can plant your bean plant in a garden when you take it home.

Eventually it will grow tasty beans!

You might
have a
garden
where you
live.

A public
park is a
kind of
garden for
lots of
people to
enjoy.

Great Gardens

Think of a garden that you like to spend time in.

It could be your own garden, a garden that you like to visit, or it could be a public garden or park.

Which garden is a happy place for you?

Great Gardens

What kind of plants grow in your favourite garden?

On your whiteboard, draw a kind of plant that you like.

Do you know what the plant is called?
If you want to, write your plant's name.

Garden Plants

What kind of plants might we find in a garden?

Garden Plants: Grass

Grass is a special kind of plant that looks good and is comfortable to walk on and sit on.

You can have a picnic on the grass.

You can play games on the grass.

You can go for a walk on the grass.

Garden Plants

buddleia

clematis

dahlia

fuschia

Here are some garden plants that people grow to look at.
Do you recognise any of these plants?

In the Garden

We are going to draw beautiful gardens!

In the Garden

Draw a beautiful garden and fill it with lovely flowers. Draw your favourite flowers from the Garden Plants Sheet. Label them with their names.

Garden Plants

I Spy Plants

While you are drawing your gardens, you will all have a chance to come and look closely at some flowers and plants.

What can you see through your magnifying glasses?

Can you see the roots?

Can you see the leaves?

Can you see the petals?

Where do you think the seeds will grow?
